

# Garden of Broken Statues: Exploring Censorship in Russia

The Garden of Broken Statues is a small park located in the center of Moscow, Russia. It is home to a collection of statues that have been removed from public spaces throughout the city. The statues depict a wide range of figures, from historical figures to literary characters. Some of the statues are broken, while others are simply missing their heads or limbs. The garden is a poignant reminder of the censorship and repression that has plagued Russia throughout its history.

The garden was founded in 1991, shortly after the collapse of the Soviet Union. At the time, many people were eager to see the removal of the statues that had been erected during the communist era. These statues were often seen as symbols of oppression and totalitarianism. The garden was created as a place where these statues could be displayed without being censored.
