### **Featured Article: Design Thinking by Tim Brown**

Tim Brown's article "Design Thinking" is a seminal piece on the subject. In this article, Brown argues that design thinking is not just a process for designers, but a mindset that can be applied to any problem. He outlines the five stages of the design thinking process:

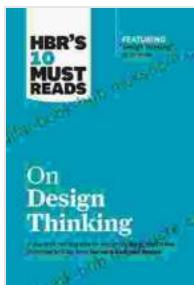

1. Empathize

2. Define
3. Ideate
4. Prototype
5. Test

Brown also discusses the importance of iteration and feedback in the design thinking process. He emphasizes that design thinking is not a linear process, but rather an iterative one. We learn from our mistakes and make adjustments along the way.

Brown's article is a must-read for anyone who wants to learn more about design thinking. It is a clear and concise to the subject, and it provides valuable insights into the design thinking process.
